Hi Dave,

I can meet you at the site office. The evap pilot pumps from the VLT pond to the evaporation heads on top of the VLT hlp.

Taurus,

That sounds interesting.

Should we meet you at the site office or on site?

Remind me of the location of the enhanced evaporation pilot system?

Thanks,

David A. Seter, P.E.

Hi Dave,

I'll be onsite running the enhanced evaporation system. If you'd like to see it in operation, let me know and we'll plan to have it running during your visit.

Regards,

Taurus

Dave,

I've copied Ron Hyatt on this so he knows to expect you. I plan to be onsite earlier that day as well, but I don't know if I will still be at the site when you arrive. Ron can see that the safety video is available when you get there. Let me know if you need further assistance touring the site.

Jack,  
Resending.  
Got an error message saying it wasn't transmitted the first time.  
Thanks,  
Dave

Subject: Site Visit / Request for Access / Yerington / June 28

Jack, Taurus,  
EPA is requesting access to the mine site on Tuesday June 28 so I may bring EPA staff for a general site visit. We aren't planning any specific field oversight activities. I plan to bring Chris Dirscherl (who is working with me on OU3 / Process Areas) and possibly Herb Levine (who is working with me on OU1 / Groundwater). Chris and possibly Herb will need to view the safety video at the site office. We plan to arrive around 2 or 230 on Tuesday. Of course, either of you or your support staff are welcome to accompany us.  
Please let me know if you have any questions or concerns, or if for some reason you can't accommodate this request.  
Thank you and best regards,

David A. Seter, P.E.
